Quad Power Outlet

With Twin USB-A & Twin USB-C

4 x 10A
Power Outlet

2 x USB-A
+ 2 x USB-C

30W PD
Charging

Quad Power Outlet Configuration

Four individual 10A, 250V mains outlets on a single circuit, allowing multiple appliances to operate simultaneously without the need for extension leads or additional power boards.

Integrated USB Charging

Four USB charging ports PD30W. When Single use, 2USB-A: 5V/3.0A, 9V/2.0A, 18W max. 2USB-C: 5V/3.0A, 9V/2.0A, 12V/2.5A, 15V/2.0A, 20V/1.5A 30W max. When combine use(Random mix) USBA-1+USBC-1/USBA-1/USBC-2, 5V/3.0A 15W max.

USB-A & USB-C Connectivity

Featuring 2 x USB-A and 2 x USB-C ports, providing compatibility with both existing and newer-generation devices.

Wide Socket Spacing

Generous spacing between outlets allows larger plugs, power packs and adapters to be used side by side without obstructing neighboring sockets.

Flush Wall Mounting

Designed to fit standard Australian wall boxes and mounting accessories on 84mm centres, with no additional backing plate required for most installations.

UV-Stabilized Finish

High-quality polycarbonate construction helps resist yellowing and fading, maintaining a clean appearance in residential and commercial installations.

Australian Standards Compliant

Designed to comply with applicable AS/NZS electrical safety standards.

Temperature & Overload Protection

Integrated USB power supply protection helps safeguard against excessive current draw and overheating.

Indoor Use Only

Suitable for internal wall installations, kitchens in dry countertop areas, offices and other indoor applications. Not suitable for outdoor or damp/exposed locations.
